DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a product, classified in class 257, subclass 532.
 - II. Claims 9-21, drawn to a process of making, classified in class 438, subclass 396.
2. The inventions are distinct, each from the other because of the following reasons: inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product, a capacitor, as claimed can be made by another and materially different process. As an example, in another and materially different process, the upper electrode of the claimed capacitor can be made without the process step of etching an upper electrode/conductive layer using the first protection layer pattern as an etching mask, as recited in claims 9 and 15. In addition, the capacitor as claimed can be made using a process does not

comprise a step of forming a first insulation layer on a substrate, as recited in claim 15.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Michael Morano on 03 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
